

SECUREPOINT
TECHNOLOGIES
LIMITED.

WHO WE ARE

Securepoint Technologies Limited is a leading technology company that is revolutionizing the way businesses operate and individuals engage with technology. We are shaping the future by developing groundbreaking solutions that address the evolving needs of our clients and society as a whole.

ABOUT COMPANY

We are a dynamic and innovative organization at the forefront of the technological revolution. Our mission is to empower individuals and businesses by providing cutting-edge solutions and leveraging the power of technology to drive positive change in the world.

OUR VISION

We envision a world where technology seamlessly integrates into every aspect of life, empowering individuals, businesses, and communities to thrive and reach their full potential.

OUR MISSION

We are committed to creating innovative solutions that solve complex problems, improve efficiency, and enhance the overall human experience.

"The future of business is digital. Embrace technology to unlock new opportunities and drive growth."

Why Choose Us.

We work better with our wide range of products from Microsoft that will take care of your enterprise business process automation needs as well as your team's productivity and collaboration.

Endpoint security is not just the software you put in place but also the firewall you have installed, with Sophos you can rest assured that your network is safe from even the most sophisticated of hack attacks.

Your enterprise data is a gold mine, whether it's a history of purchases and activities, or demographic information, each data point helps your organization adapt better to the changing customer needs.

We help you transform your enterprise into a transparent, predictive, and resilient operating model that will meet more complex demands from customers, and in turn helping you make better business decisions.

When you need a trusted brand in networking solutions, there is no other brand you can think of other than Cisco. We have a team of certified engineers to help you deploy and maintain your Cisco solution with ease

Secure your data in a cloud-ready environment that will unleash unprecedented performance, whether you're going fully cloud or taking a hybrid cloud approach, we'll work with you to develop a data management plan that's right for your needs.

“

*What matters is what it
can do for your business.*

Our Solutions, Services and **Industries**

We deliver business value in a cost-effective way

Our Solutions & Services

IT Consulting

In our experience, many companies waste a large portion of their budget on technical difficulties that arise from faulty equipment, outdated software or even a lack of skilled man power.

Project Management

Downtime, delays or data loss can cost companies thousands and sometimes millions of shillings, so getting things done right the first time is absolutely critical to the success of any I.T project.

Enterprise Application Integration Services

Since all departments, depend on each other, the data needs to flow between them. Enterprise Integration solutions, enable multiple systems to talk to each other, which in turn unlocks the synergies between the information in each department.

Business Continuity Plan

Also commonly referred to as “Backup and Disaster Recovery,” which often involves duplicating company and client data on a secure server (either on-site or off-site) as a form of insurance against potential physical and online disasters.

Business Process automation (BPA)

You know you need BPA when you experience bottlenecks and are unable to pinpoint the root cause. or you lack a central system and manual processes introduce several issues that are time consuming.

Managed IT Services

All technical stuff aside, this is exactly what our Managed IT Support Service plans are designed to do. We purposely built our managed I.T services to proactively maintain your infrastructure, day-to-day tech support, network security and ongoing technology strategy

WHAT WE DO.

As an IT company, we offer a comprehensive range of services and solutions designed to meet your technology needs and drive your business forward.
